Education

University of Florida Gainesville, FL
M.S. in Information Systems & Operations Management (Admitted) *Jan 2027 – May 2028*
Data Science Concentration

University of Florida Gainesville, FL
B.S. in Computer Science, Minor in Business Administration, AI Certificate, GPA: 3.47 *Dec 2026 Expected*

Relevant Coursework: UX Design, Human-Computer Interaction, Business Analytics and AI, Principles of Management, Principles of Marketing, Business Finance, Data Structures and Algorithms, Database Systems

Professional Experience

Technology Intern, Business Technology Office May 2026 – Aug 2026
Freddie Mac - Federal Home Loan Mortgage Corporation *McLean, VA*

- Partnered with Accounting stakeholders to ship **4 features** for a Multifamily Finance accounting application (Angular, Spring Boot), including a dynamic component system that cut new-screen build time from **3 days to 1**.
- Diagnosed a recurring cross-team debugging bottleneck and built a Cytoscape.js dependency-graph visualizer, adopted by the engineering team to replace ad-hoc tracing during incident triage.
- Identified that **60%** of Fortify security pipeline alerts were false positives, interviewed **5 InfoSec SMEs**, and co-built an agentic triage prototype using KNN similarity retrieval to pre-screen them; demoed it to **4 SVPs** in the intern innovation challenge, securing approval to pilot with InfoSec.

Generative AI Engineer Intern Jan 2026 – May 2026
Healthcare AI Consulting, LLC *Gainesville, FL*

- Designed and implemented 14 React/TypeScript pages and **15 reusable UI components** as one of 5 engineers on a full-stack AI platform, building core user flows for onboarding, skill execution, and admin management.
- Audited the production frontend against accessibility standards and implemented **127 ARIA attributes** across **23 of 31 components (74%)**, enabling full keyboard and screen-reader access for assistive-technology users.
- Integrated the Tavily search API as a grounded data source into a 4-stage agentic AI pipeline (plan, research, verify, synthesize), cutting throttled LLM calls per run from **13 to 3** and worst-case latency by **approx. 2 minutes**.

Client Engineering Intern Jun 2024 – Jul 2024
IBM - International Business Machines *Remote, US*

- Engineered an AI chatbot for a health insurance client using IBM WatsonX Assistant and NLP, automating common customer queries and cutting average response time by **75%**.
- Analyzed competitive market data on customer service chatbots to shape a product roadmap presented to senior leadership, prioritizing automation of credential verification and plan upgrades/downgrades.

Projects

PRD Studio | *React, TypeScript, FastAPI, Llama 3.3-70B via Groq* **Live Demo**

- Designed a **3-agent pipeline** (Research Agent → PM Agent → Risk Analyst Agent) that converts a product idea into a market research report, Product Requirements Document, and risk analysis in under **2 minutes**, producing table-driven deliverables ready for engineering and stakeholder review.
- Solo-built and deployed the production web app, with streaming output and one-click ZIP export of all 3 reports.

RTS Transit App Redesign | *User Research, Personas, Wireframing, Concept Scoring*

- Interviewed **5 riders** of the current RTS app and synthesized findings into an **affinity diagram**, 5 user needs, and 2 personas following the UX design process, surfacing inaccurate arrival times and vanishing buses as core failures.
- Evaluated 2 concepts and selected **HeadsUp** (NUF score **91 vs. 89**), designing wireframes and wireflows for leave-by alerts, vanished-bus alerts, status tags, and a one-tap backup plan.

Technical Skills

Product & Analysis: Agile Methodologies, A/B Testing, Usability Testing, Wireframing/Prototyping, Figma
Languages: Python, Java, C++, JavaScript/TypeScript, SQL
Tools & Platforms: Microsoft Excel, PowerPoint, Jira, MongoDB, Git, Bitbucket, IBM watsonx, Claude Code, Kiro
Frameworks & Libraries: Angular, React, Node.js, Spring Boot, FastAPI, RxJS, NumPy, Pandas, Cytoscape.js
